LEONG MIN ZHI
Assistant Principal
Sekolah Sri UCSI
Kuala Lumpur

Dear Sri UCSI Kuala Lumpur Community,

As we move through the months of August and September, it has been encouraging to see our students actively involved in a wide range of learning, leadership and community experiences beyond the classroom. From the MSSD Olahraga and ASEC UPM, to the Swimming Gala and Hari Merdeka Celebration, our students have demonstrated teamwork, perseverance and school spirit.

These months have also provided valuable opportunities for personal growth and leadership. The appointment of our Student Council, our UCSI College Visit, School Leadership Camp and Bengkel SPM have encouraged students to take greater ownership of their learning, leadership and future pathways. Each of these experiences contributes to our aim of developing confident, responsible and well-rounded young people.

As we look ahead to October, our students will enter an important period of academic assessment, with the End-of-Year Examinations, MPT4 examinations and Cambridge Examinations taking place throughout the month. We encourage all students to approach these assessments with confidence, consistency and a positive mindset. With the support of their teachers and parents, students are encouraged to manage their time effectively, maintain a regular revision routine and prepare to demonstrate the knowledge and skills they have developed throughout the year.

As always, we are proud of the commitment and enthusiasm shown by our students and grateful to our teachers, parents and school community for their continued support. Let us look forward to a productive October and continue working together to help every student reach their potential.

SPECIAL MESSAGE

ISSUE 35
30.9.2026

Dear Sri UCSI Community,

Receiving the Third Place – Anugerah Guru Berwibawa: Guru Sekolah Swasta Berwibawa, Wacana Inspirasi Pendidikan WPKL Tahun 2026 was a deeply meaningful moment for me. While I am grateful and honoured to receive this recognition, I see it as much more than a personal achievement. It represents the collective efforts of the students, teachers, colleagues and school community who have been part of my journey as an educator and leader.

Since taking on the role of Assistant Principal for Student Affairs and Co-curriculum, I have come to appreciate even more deeply that education extends far beyond academic achievement. Students learn not only through lessons and examinations, but also through participation, leadership, teamwork, competition, service and the many experiences that shape who they become.

Much of my work has therefore focused on creating opportunities for students to discover themselves beyond the classroom. Through co-curricular activities, student leadership, sports, school events, competitions, community initiatives and international engagements, I believe every experience can become a meaningful learning opportunity. Seeing students develop confidence, take responsibility, overcome challenges and discover strengths they may not have recognised in themselves is one of the most rewarding aspects of my role.

This recognition has also encouraged me to reflect on what leadership means to me. Leadership is not simply about holding a position or managing a portfolio. It is about listening, supporting others, solving problems, making decisions when necessary and remaining committed even when much of the work happens quietly behind the scenes.

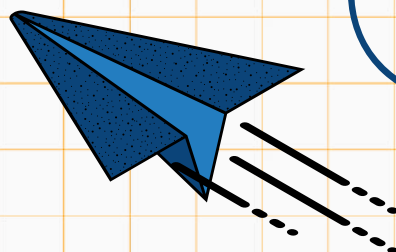

I would like to express my sincere appreciation to Dr. Wong Kin Tung, our Principal, for his trust, encouragement and support throughout my leadership journey. His belief in the importance of student development and leadership has given me opportunities to take on responsibilities, initiate programmes and continuously look for ways to enrich the experiences we provide for our students.

I am equally grateful to the colleagues who have worked alongside me and contributed to the many initiatives we undertake. Behind every successful event, CCA, student activity or programme is a team of people working together. This experience has reminded me that meaningful leadership is built through collaboration and trust.

Most importantly, this award has strengthened my belief that academic and student development should never be viewed as separate journeys. Academic learning equips students with knowledge and skills, while experiences beyond the classroom help them develop confidence, character, resilience, responsibility and a sense of purpose. Together, these experiences contribute to the development of the whole child.

I receive this recognition with gratitude, but also with a renewed sense of responsibility. An award may mark a milestone, but it should also inspire us to continue learning, improving and creating meaningful opportunities for our students. I dedicate this recognition to the students who continue to inspire me, the colleagues who make the work possible, and the school community that has given me the opportunity to grow as an educator and leader.

I am grateful for the recognition, but even more grateful for the journey that led me here

SPECIAL MESSAGE

ISSUE 35
30.9.2026

I am deeply honoured to be the 2nd-place recipient of the Anugerah Khas Pendidikan Kepimpinan Sekolah Swasta 2026 (Private School Leadership Special Education Award), awarded by Jabatan Pendidikan Wilayah Persekutuan Kuala Lumpur (JPWPKL). It is a historic moment for me, and I would like to share it with everyone who made it possible.

I began as a science teacher, and today I serve as Assistant Principal for Administration and Curriculum. Through every role, one thing has stayed the same: I keep asking how we can improve the systems around teaching and learning. Two things have defined this work.

The first is helping our teachers adopt 21st-century learning confidently and consistently, something I have been mentoring colleagues on since 2023. The thoughtful integration of Microsoft and AI tools has reshaped the learning experience of our school community. Where some see AI and technology as a threat to education, I see them as powerful tools for practical application and simulation.

To further develop the 5Cs, coursework and alternative assessments are now integral to our school assessments. Our students do not only learn concepts from readily available resources; they also solve problems through a systematic approach and communicate their solutions effectively through presentations.

The second is moving our school from opinion-based feedback to data-informed decision-making. That meant building an Assessment Tracker and Reporting Template, and later a Trend Analysis Dashboard, so our teachers and the Senior Leadership Team could see student progress clearly and spot early who needed intervention. These trackers do not merely store data. They are semi-autonomous and include error-detection features, so our data is accurate and its interpretation is fair.

Kickstarting this work was not easy, and none of it would have happened without our principal, who trusted me with time, space and the opportunity to lead, and nominated me for this recognition. It also happened because our teachers were willing to step outside their comfort zones, try new practices and give honest feedback. And it happened because of our students, parents and everyone who let me try, fail, learn and try again. Your willingness to experiment is what turns an initiative into a culture.

I have come to believe that leadership is not measured by how far we go alone, but by how many others grow because we believed in them. So, I do not see this award as the end of a journey. It is a reminder to keep learning, keep serving, and keep creating opportunities for others to grow.

I invite our teachers, parents and students to come together and build an education landscape at Sekolah Sri UCSI Kuala Lumpur that is competitive not only in academic results, but also excellent in design thinking and innovation.

Again: How can we do better?

All these are for our students, teachers, and the future of education.

LEADERSHIP CAMP

SSUKL Leadership Camp 2026 – Lead with Courage, Serve with Purpose, Grow Beyond the Classroom

From 17–19 September 2026, our Student Council Members and Secondary students participated in a 3-day, 2-night leadership camp at Kuala Selangor Cabin Camp. Through team-building challenges, strategic games, survival activities, obstacle courses, jungle trekking, archery, campfire activities, and problem-solving tasks, students were given opportunities to strengthen their communication, teamwork, decision-making, resilience, and leadership skills. This year's camp was made even more meaningful through collaboration with student leaders from Sri UCSI Springhill Campus, allowing students to build new friendships, exchange ideas, and learn to work with different personalities and leadership styles. More than just an outdoor experience, the camp encouraged students to step out of their comfort zones, support one another, and discover what it truly means to lead with confidence, courage, and purpose.

HEALTHY FRIENDSHIPS

What makes a friendship healthy?

1. Respect

- Respect each other's feelings, opinions, and boundaries.

4. Communicate

- Talk about problems respectfully.

2. Listen

- Give your friend a chance to speak & listen without interrupting.

5. Include

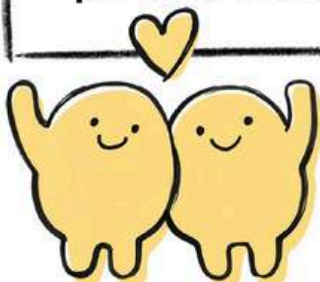

- Don't leave someone out on purpose.
- Make space for others.

3. Support

- Encourage rather than put each other down.

6. Give Space

- Respect each other's need for personal space and other friendships.

Pause & Think
What kind of friend am I?

Be the kind of friend you want to have
