INTERNATIONAL MOTHER EARTH DAY

International Mother Earth Day was recently celebrated at Sekolah Sri UCSI, a global observance dedicated to raising awareness about environmental protection and promoting sustainable practices. It highlights critical issues such as climate change, biodiversity loss, pollution, and deforestation. Each year, the United Nations selects a theme to focus global efforts. Recent themes have included "Restore Our Earth," "Climate Action," and "Protect Our Species," addressing urgent ecological challenges through collective action.

MANDARIN TEACHER

In Malaysia, embracing Mandarin as a third language offers myriad advantages in the professional arena. Firstly, it opens doors to a vast network of Chinese-speaking businesses, both locally and globally, facilitating communication and fostering stronger partnerships. Mandarin proficiency enhances competitiveness in industries like trade, tourism, and technology, where connections with Chinese markets are crucial.

“Unlocking Lifestyle Advantages: Embracing Mandarin as a Third Language in Malaysia”

Additionally, Malaysia's multicultural landscape values linguistic diversity, and fluency in Mandarin demonstrates adaptability and cultural awareness, earning respect and trust from colleagues and clients alike. Moreover, mastering Mandarin boosts cognitive abilities, improving problem-solving skills and cognitive flexibility. In a rapidly evolving global economy, the ability to navigate linguistic and cultural barriers becomes indispensable.

Therefore, integrating Mandarin into Malaysia's professional sphere not only enriches individual career prospects but also contributes to the nation's economic growth and international standing.

PAST EVENTS

KANGAROO MATHS COMPETITION

The Kangaroo Maths Competition is an international contest aimed at fostering a love for mathematics among primary to secondary students. It challenges their mathematical thinking and problem-solving skills with multiple-choice questions of varying difficulty, requiring creative and logical reasoning, thereby deepening their understanding and appreciation of mathematics. The Kangaroo Maths Competition aims to nurture young mathematicians and make math enjoyable and accessible.

INTERNATIONAL EARTH DAY

International Earth Day serves as a reminder of our collective responsibility to protect the environment and promote a sustainable future for generations to come. Through global cooperation and local action, it highlights the importance of taking meaningful steps towards preserving the natural world. At Sri UCSI Springhill, we hosted an activity to let students creatively design posters as a way to promote eco-friendly practices and encourage responsible stewardship of the Earth. Primary students did collage posters using real leaves and flowers while secondary students did e-posters. We believe these sort of activities will foster the love towards Earth in students.

Fun Art for Kids

Everyone thinks that art and creativity are vital, but do you know the real benefits of art for children? Art allows kids to express their imaginations and emotions while developing fine motor skills. It helps build self-esteem and communication abilities. Through various art forms like drawing, painting, sculpting, and collage, children can discover their unique creative talents. Art fosters creativity, boosts self-esteem, and is a powerful way for children to express their feelings. Let's nurture your children's imagination and awaken their talents through art.

Letter-Writing Activity for Children

In this activity, children will learn to write and send a letter. Each child will receive paper, envelopes, and stamps, and the teacher will guide them through writing a personal letter, addressing an envelope, and understanding the postal system. After writing and sealing the letters, the teacher helps mail them. This activity develops literacy skills, such as handwriting, and teaches children to express their thoughts and feelings clearly. Addressing an envelope and learning about the postal system fosters independence and real-world knowledge. The excitement of sending and receiving mail boosts confidence and creates a memorable experience.

PRIMARY

LEARNING ZONE

MANIPULATIVE SKILLS IN STANDARD 3

Manipulative skills refer to the ability to use and handle science apparatus and specimens correctly when carrying out an investigation. Our standard 3 students were really enjoyed and having fun during their science outdoor activity. They catch the dragonfly and butterfly and learnt the correct way to handle the

specimens with care. With gentle hands and curious eyes, they observed the intricate details of these beautiful creatures up close. This hands-on experience not only enhanced their manipulative skills in science but also sparked a deeper connection to the wonders of nature.

LEARNING ZONE

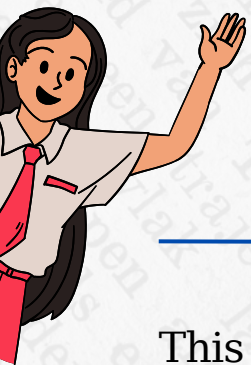

AMAZING EXPERIENCE WITH STEM

STEM education integrates science, technology, engineering, and mathematics. It promotes fun learning through activities that enhance skills like problem-solving and creativity. Other than that, as a teacher, we highlight the teamwork spirit between students as one of the objectives that need to

be achieved. Group activities are organized to enhance their communication skills and boost their teamwork spirit. Outdoor activities, such as exploring animal habitats, are conducted to achieve these goals.

SECONDARY LEARNING ZONE

LEARNING LIFE LESSONS THROUGH THE MAGIC OF MOVIES IN FORM 5!

Aligned UCSI Schools's aim which is to develop global citizens and inspire future leaders by providing a new technology education, our educators use Blended Learning in our class. In Pendidikan Moral classes, good movies are shown as examples, and students write about what they've learned from them.

This week, the teacher showcased Disney's Mulan. The film's moral emphasizes courage, perseverance, and staying true to oneself. Mulan's story revolves around challenging gender stereotypes and societal norms to defend her family and country.

THE SECONDARY LEARNING ZONE

FUN ACTIVITY

We did some activities for students such as drawing and coloring. Students shown that, they're really happy and enjoy doing that activity. Not only for fun, this activities can improve motor skills and coordination. This is because observational drawing requires logic and creativity, both the right and left sides of the brain are actived.

SEKOLAH SRI UCSI
SPRINGHILL (SEREMBAN/PD)

Discover Tadika Sri UCSI!

Tadika Sri UCSI Springhill (Seremban/ PD):
Experience a Holistic 21st Century Preschool nestled in a serene 20-acre integrated international school campus.

KIDE Science Courses from Finland:
Engage your child in innovative KIDE Science courses imported from Finland, sparking curiosity and exploration.

Weekly Swimming Lessons:
Enjoy complimentary weekly swimming lessons with a professional coach, fostering confidence and physical development.

Trilingual Exposure:
Immerse your child in a trilingual environment, mastering English, BM (Bahasa Malaysia), and Mandarin fluently.

Year 2024 Intake Open:
Secure your child's spot for the Year 2024 intake and witness their educational journey bloom.

Register for Free Trial Classes:
Discover the enriching learning environment of Tadika Sri UCSI by joining our Free Trial Classes.

All this and more for only
RM694 per month!
