

# THE EAGLES

## VICTORY IS OURS!

SEKOLAH SRI UCSI SPRINGHILL CAMPUS held their annual Sports Day on July 20th 2024. Students from EYC to Form 5 participated in running, throwing, jumping and relay events to earn points for their Houses. Green House was victorious, scoring the highest points to win the Champion House Challenge Trophy. The day was a success thanks to preparation by the Sports Day Committee and teachers, and strong participation from parents and guardians who cheered on the competitive but sporting events.

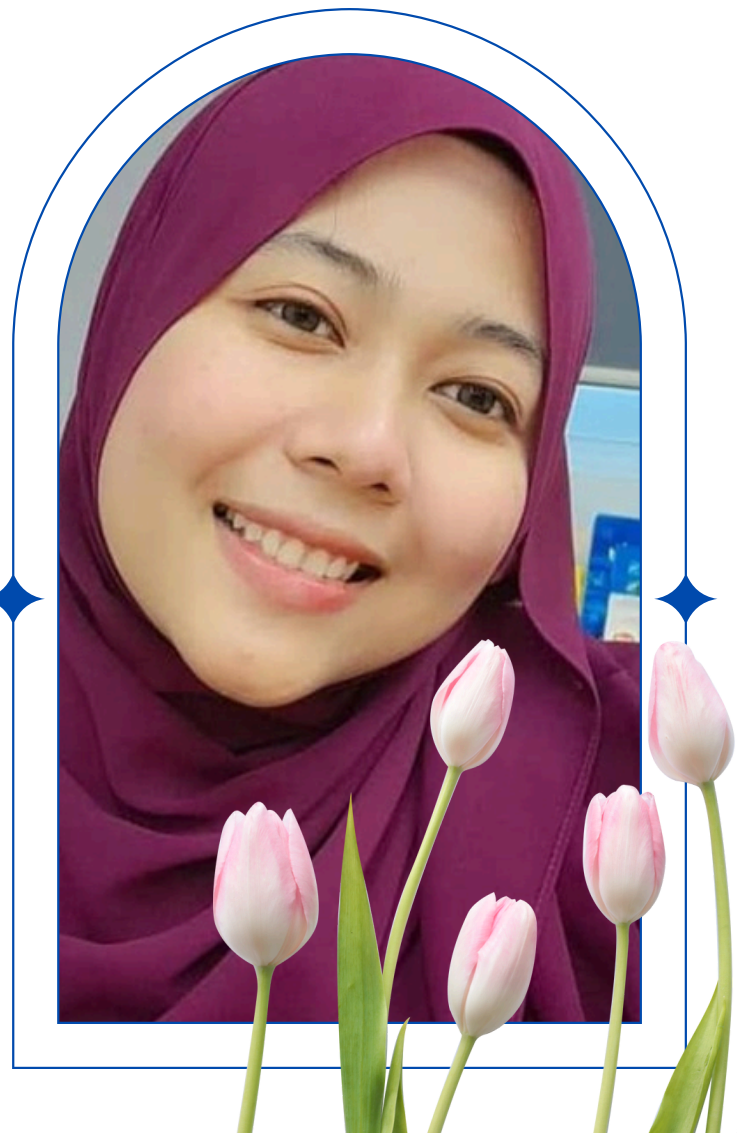

# TEACHER SPOTLIGHT

The bi-weekly teacher's NEWSLETTER of The Eagles

## MISS NOR HANISAH EYC TEACHER

Teachers spend their days presenting lessons, creating new lesson plans, assessing learning outcomes, teaching students, directing after-school activities, and grading papers. The fun and excitement of seeing children learn and progress is one of the successes and joys of being a teacher.

For me, teaching children related to new learning is very exciting. We can see various reactions shown by the children. They are honest with their feelings. I feel that my days will be cheerful by listening to stories and questions from them. It also teaches me something new sometimes.

As a teacher in early childhood education, I play a very important role in providing them with basic knowledge before they step into the real world. I also play a role in educating them about discipline and respect. This will teach them to be prudent. Seeing them respect each other and apply those values to each other is my success.

Teaching children and being their teacher is not as easy as people think. I need to be creative and think of fun activities so that the knowledge they receive is meaningful and effective. I am not only a teacher who teaches about learning, but I am also a parent in the school who needs to care and take care of them from all aspects. If we feel that the task is compatible and enjoyable, we will also feel fun and enjoyable throughout being a teacher.

Therefore, being a teacher is not something easy and fun, but try to ask yourself. Do you enjoy being a teacher?

# PAST EVENTS

## MSSD VOLLEYBALL TOURNAMENT

Sri UCSI School's volleyball team showcased a dynamic performance at the MSSD Championship held on July 18, 2024. The team defeated one opponent with a score of 31-23 in a highly competitive match. "I'm incredibly proud of these young athletes. Their dedication, teamwork, and resilience have been remarkable," said the coaches. Their passion and dedication on the volleyball court showed through and ensured a truly skillful performance! Well done!

## MSSNS SWIMMING COMPETITION

In a thrilling display of athleticism and talent, Sekolah Sri UCSI Springhill swimmers excelled at the MSSNS held on July 25, 2024, at the Paroi Aquatic Center. The event featured swimmers of all ages competing across various events, with several standout performances and new records set.

## Fun Phonics Learning Activity

Phonics Learning teaches beginners to read and pronounce words by learning the phonetic value of letters, letter groups, and especially syllables. By teaching them the relationship between letters and sounds, phonics helps young learners to decode and recognize words effortlessly. The activity enables children to listen to the sound and form the word using the flashcards. The children are able to develop their listening, language, cognitive, and speaking skills through this activity. Moreover, they learn how to read and write the words as well. This type of activity enables children to learn reading without memorizing the words; instead, they are mastering reading by learning the science of reading, which is phonics.

## Art and Creative Education

Children are like white cloth that is clean and pure from any impurity or damage. These people are still at an age to learn about life before stepping into adulthood. Therefore, whatever the adults teach them will be an aspect in the formation of themselves. Most parents only emphasize the importance of education to their children, whereas there are many other aspects that help children's self-development, such as creative arts.

Art and creativity are very important in the development of children because this aspect will bring forth a creative attitude in them in addition to stimulating the development of the child's brain. Art and craft activities for kids are not only fun but also great for developing creativity, fine motor skills, and cognitive abilities. Art and creative education are very important in the physical formation and emotional development of your child today. Art can not only help from the aspect of emotional or spiritual development; art can also help in the physical development of children, which is very necessary, such as adult writing skills. Therefore, parents should emphasize the importance of artistic and creative education from an early age.

## PRIMARY LEARNING ZONE

### CRAFT YOUR DREAMS!

This is a class my students will always be looking forward to. Here we will build up a new project to enrich their creativity and to make the learning interesting. As I explained in my earlier writing, RBT is basically a more hands-on project. The students are always eager to get to know the project of the topic. Once a topic has been introduced to the students, we will end the topic with a hands-on project. While doing the project, the students will explore their creativity level and this is also one way to teach them to do teamwork.

Here the students will learn that good teamwork will bring out an excellent outcome. RBT is a fun subject with more things to be explored. I can see the development in the students planning a project and presenting it have changed to livelier. The happy faces of my students are my success as a teacher.

## PRIMARY LEARNING ZONE

**MASTER THE ART OF COOKING: ESSENTIAL LIFE  
SKILLS FOR EVERY KITCHEN**

In today's fast-paced and ever-changing world, living skills have become indispensable for leading a successful and fulfilling life. These skills, which encompass a broad range of practical abilities, are crucial not only for personal development but also for navigating the complexities of modern society.

Here, students will explore the significance of living skills, examine key areas such as financial literacy, cooking, time management, emotional intelligence, and communication, and discuss how mastering these skills can lead to a more balanced and successful life. Unlike academic knowledge, which often focuses on theoretical concepts, living skills are grounded in practical application and real-world experiences.

# SECONDARY LEARNING ZONE

This chapter is fundamental for understanding heat, as it plays a crucial role in our daily lives. To ensure students grasp the concepts thoroughly, I use a multi-faceted teaching approach. During lessons, the teacher utilized slides and the textbook to explain the topic clearly. The teacher engaged with the students by asking them questions related to the material, encouraging active participation and critical thinking. Additionally, a discussion on real-life phenomena to illustrate the relevance of heat in everyday contexts, helped students think beyond the textbook and connect theoretical knowledge to practical applications. To reinforce their understanding and prepare them for exams, tutorials that offer extensive practice on this chapter were discussed. These tutorials were designed to sharpen students' knowledge and enhance their problem-solving skills. After working through the tutorials, students present their solutions in front of the class. This practice not only builds their confidence but also fosters a collaborative learning environment where they can learn from each other's approaches.

**Welcome to this  
month's edition!  
Form 4  
Chapter 4: Heat**

**Through this comprehensive approach, combining theoretical instruction, real-life applications, practical tutorials, and interactive presentations, students develop a deep and well-rounded understanding of the chapter on heat. This method not only prepares them for exams but also equips them with the skills to apply their knowledge in real-world situations.**

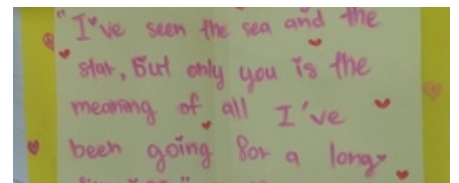

# SECONDARY LEARNING ZONE

## Origami Kasih Sayang Untuk Sahabat

Dalam Unit 7 Pendidikan Moral Tingkatan 1 yang bertajuk "Bijaksana Memilih Kawan," aktiviti membuat origami kasih sayang kepada sahabat boleh memberi beberapa kepentingan dan perasaan yang positif. Aktiviti ini membantu mengeratkan lagi hubungan antara pelajar dengan rakan-rakan mereka. Melalui pemberian kad, mereka dapat menunjukkan penghargaan dan kasih sayang kepada satu sama lain. Dengan membuat dan memberi kad, pelajar diajar untuk menghargai rakan-rakan mereka dan memahami perasaan orang lain. Ini menggalakkan mereka untuk lebih empati dan prihatin terhadap perasaan rakan-rakan. Membuat origami adalah satu aktiviti yang memerlukan kreativiti dan kesabaran. Ini boleh membantu pelajar mengembangkan kemahiran kreatif mereka dan menikmati proses penciptaan sesuatu dengan tangan mereka sendiri. Aktiviti ini boleh meningkatkan kemahiran komunikasi dan interaksi sosial pelajar. Mereka belajar bagaimana untuk menyampaikan perasaan dan penghargaan mereka dengan cara yang positif dan kreatif. Aktiviti ini memberi peluang kepada pelajar untuk belajar secara praktikal tentang nilai-nilai moral seperti kasih sayang, penghargaan, dan empati. Oleh itu, nilai-nilai moral yang diajar dalam unit ini dapat diukuhkan dengan cara yang menyeronokkan dan bermakna. Persekitaran kelas juga menjadi positif yang seterusnya boleh meningkatkan motivasi dan keseronokan belajar. Aktiviti ini memberi pengalaman berharga kepada pelajar tentang bagaimana untuk menghargai dan menunjukkan kasih sayang kepada rakan-rakan mereka, yang juga merupakan kemahiran hidup yang penting.

**Secara keseluruhannya, aktiviti membuat origami kasih sayang ini adalah satu cara yang kreatif dan bermakna untuk mengajar dan menguatkan nilai-nilai moral dalam diri pelajar.**
