## Message from Exam Department

Greetings.

The examination season is coming!

Sekolah Sri UCSI Springhill does not just hold an internal examination such as Mid-Year Examination and End of Year Examination, but we are also one of the SPM Centres for Port Dickson Schools under Jabatan Pendidikan Malaysia. Year 2023 will be our second year as SPM centre for our Form 5 students and also external students.

First of all, I would like to congratulate our Form 5 students who have successfully completed their SPM Trial Examinations. Now let's focus on the upcoming SPM Examination which will begin at the end of January 2023. Students are expected to complete their SPM Examination on Mid-February 2023.

In the meantime, our Standard 1 until Form 4 students will be having their End of Year examination which is scheduled to begin on second week of January 2023. Good news! Students will finish their examination before going for Chinese New Year's break.

Examination season can be quite a stressful week for students. So, let's help ease their stress by giving them moral support. Talk to them and believed in them. So that they can excel in their exams with flying colour. Finally, this is my message for our beloved students.

*"Take a deep breath, say a small prayer, think of all your hard work and start the exam. You will do great. All the best!"*

**Nur Izzati binti Mohd Anuar**

# ENGLISH Week

Enhancing and polishing students' English skills throughout the entire week with English Week activities! It is time for them to test all their 4 skills and having fun at the same time.

## Solving Riddles

Students had to work with their partner to solve a mystery to find out who the killer is. It was a struggle and they definitely needed to crack their brain, but it was all worth it.

## Spelling Bee

Trying to imagine a word and spell it out loud was surely not an easy task, but the students did it!

## Karaoke Session

It's time to shine bright like a superstar. Students definitely took up this challenge to bring out the superstar in them and sang their favourite English song.

# Children's Day

On 25th November 2022, we had organized Children's Day for all our EYC and primary students. The main objective of this event is to celebrate all children in the school and appreciate them as they bring so much of joy and happiness into our lives. This day was even special as students dressed up in their dream career costumes. Many activities were carried out to celebrate our students. We had doodle colouring, sandwich making, mini picnic and we also played musical chairs. Students enjoyed themselves throughout the activities.

Upper primary students are making egg sandwiches for mini picnic.

EYC students carrying out doodle colouring.

Students get together to play some games in the hall.

Standard 2 students in their ambition costumes.

# MINGGU BAHASA MELAYU

## Pertandingan Menulis Esei Bahasa Melayu

Bahasa Melayu merupakan bahasa perantaraan yang sangat penting dan istimewa bagi kita semua, rakyat Malaysia kerana ia adalah bahasa kebangsaan dan bahasa perpaduan rakyat Malaysia. Kami di Sekolah Sri UCSI Springhill menghayati dan menghalusi penggunaan Bahasa Melayu di mana kami dapat berhubung secara rasmi dan berhubung rapat tanpa mengira kaum dan agama selain dari menggunakan Bahasa Inggeris sebagai bahasa global.

Penulisan karangan para pelajar ialah bertemakan alam sekitar dan melibatkan pelajar sekolah rendah (tahap 2) dan sekolah menengah. Pertandingan ini dapat mengasah pemikiran kritis para pelajar dalam memberikan hujah-hujah yang bernas dalam bentuk penulisan karangan dengan bertemakan alam sekitar. Selain itu, pertandingan ini dapat memberikan pendedahan awal kepada para pelajar dan memberikan pengalaman yang bermakna sebagai bekalan untuk pertandingan menulis esei di peringkat luar sekolah pada masa hadapan. Tahniah para pelajar!

# SWIMMING GALA

Internal Swimming Gala 2022 is one of the competitive programs that would help to gauge and evaluate swimming skills among Sri UCSI (SSU) Springhill's students as swimming lessons being part of the school's curriculum. Besides, this competitive program also enables SSU Springhill's students to be more productive and ensure to keep fit as well as encourage to sharpen their swimming skills among students.

The Secondary students were doing their freestyle for 50m. The winners for freestyle 50m according to their ages and genders are Ong Xin Rong (Form 2), Yap Jien Hui (Form 4) and Lau Min Hui (Form 4).

# CHRISTMAS CELEBRATION

It was celebrated with everyone's heart full of joy and happiness as Christmas day itself is a day where everyone gets to share their happiness with everyone around. We played games, baked cookies, did some arts and surely enjoying all of the wonderful performances by our talented students.

The day was also especially memorable and remarkable because we had invited the children from Pusat Jagaan Shekinah Care Centre to celebrate Christmas together with us. By having them with us that day, our students get to learn the value of sharing and care for others especially when we are capable of giving more.

# LEADERSHIP CAMP @ BROGA

A good leader is always trained since young. With the practice and a believe that 5C values could shape a good leader, our students ended their school days with a leadership camp. Through this camp, we hope to encourage students to be more independent in managing their daily life and create a supportive atmosphere among peers. In this camping, students were required to work together to earn point in different games and presentations. They were also challenged to face their fears through challenging activities such as wall climbing, flying fox, raft challenge and wall abseiling.

# EARLY YEARS LEARNING ACTIVITIES

## CREATING A MINI BOOK

Transforming pieces of paper into a mini book is much more exciting for students to trace, write or paste items related to the title of the book. The students enjoyed flicking through the books they have made and sharing them with others, which is a great way to promote reading habit in general. Last but not least, the best part of book making is to provide a sense of achievement. When the students are pleased with something they have worked hard on, they are optimistic about their learning and feel proud of themselves.

## BEAR COUNTER PATTERN ACTIVITY

Learning about patterns is a basic but fundamental math skill upon which many mathematical skills and concepts are based. Patterns are things that repeated in a logical way. Our EYC students undergo different stages of pattern learning in order to achieve the mastery of patterning, which are as follows: recognize a pattern, describe a pattern, copy a pattern, extend a pattern and create a pattern. With plenty of patterning practice, EYC students are able to create and extend two-step patterns.

# PRIMARY LEARNING ACTIVITIES

## *Kata Ganda Lima Jari*

Objektif aktiviti ini adalah supaya murid memahami dan menggunakan kata ganda penuh, kata ganda separa dan kata ganda berentak mengikut konteks. Di dalam aktiviti ini, murid-murid dikehendaki menulis 5 contoh kata ganda. Setiap 5 jari tersebut mewakili 5 contoh kata ganda penuh, kata ganda separa dan kata ganda berentak. Kemudian, murid-murid membuat dekorasi pada kraf Kata Ganda Lima Jari tersebut mengikut kreativiti masing-masing. Seterusnya, murid-murid diminta untuk membaca kata ganda yang mereka tulis di hadapan kawan-kawan dan guru di dalam kelas.

## *Expressing Your Emotions in a Healthy Way*

The students were learning on how to express their emotions in a healthy way during Physical Health Education. The healthy way may avoid the students to do something that would trigger anyone feelings and emotions. The extrovert will be thinking that "Talking" is the best cure on how to express their emotions.

The initiative on doing the Emotion Face Mask would be much easier for the students that could be an introvert or even the extrovert to express their emotions to cope any challenges or bad things that might be happening and disrupt their normal emotion.

# SECONDARY LEARNING ACTIVITIES

## ACID AND ALKALI

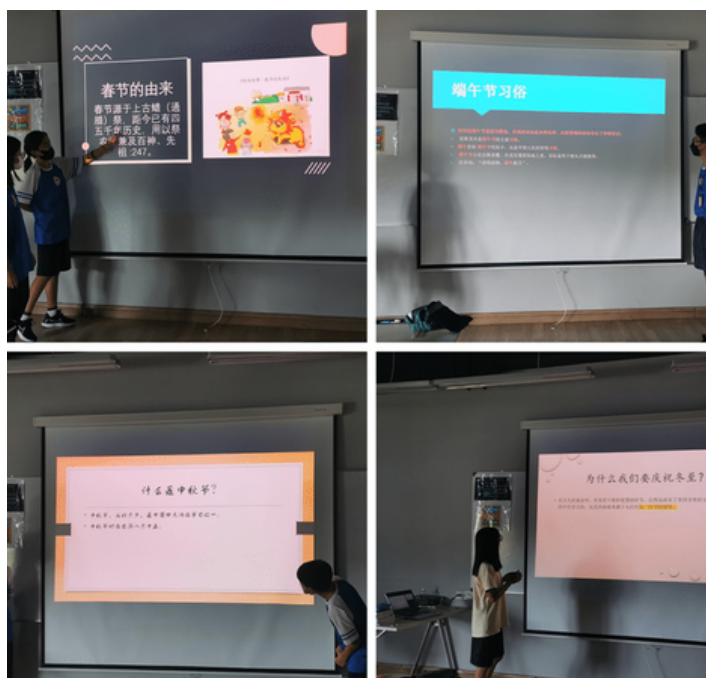

Acid and alkaline substances are used by all of us in our daily life. What happens when acid and alkaline are mixed? Form 2 students learn on the results of them. Form 2 student conducted Neutralization Using Titration Method Experiment. They used hydrochloric acid, sodium hydroxide, water, and universal indicator as their materials. They also used retort stand, pipette, measuring cylinders, filter funnel and beakers to set up their experiment. Students mixed both hydrochloric acid and sodium hydroxide until they turn colorless. They observed the color change from pink to colorless. Students enjoyed their experiment and was able to understand the neutralization process thru practical learning.

## UNDERSTANDING FOUR SEASON

Chinese celebrates four main festival throughout the year. It was literally important to understand the tradition and culture practiced by the ethnic in learning languages.

The Form 1 students get a chance to explore the main festivals celebrated by Chinese and share with their classmate in class. Kudos to all that put in effort to share their findings!

## ***Be a Swimming Master!***

Swimming helps to maintain a healthy weight, healthy heart and lungs. It is a healthy activity that you can continue for your lifetime.

In UCSI Springhill Swimming Academy, we are passionate to teach swimming with qualified coach, Olympic size swimming pool, facilities as well as dedicated customer service team.
