## MONTHLY RECAP

### IN THIS ISSUE

- MONTHLY RECAP
- UPCOMING EVENTS
- LEARNING ACTIVITIES

The Year Of Rabbit is celebrated with so much joy by everyone. We made Yee Sang, learned the arts of Chinese calligraphy and baked some delicious delicacies. Definitely a wonderful Chinese New Year Celebration this year.

## CHINESE NEW YEAR CELEBRATION

## BOOM BOOM BANG!

It's almost the end of school year so it means PLAY TIME! For 7 days students participated in various activities and games organised by the teachers. The goal is to score highest mark for all activities and win the Best Team. But most importantly is to have fun and enjoy their last days of school.

# Arts Stream Is Not The Second Choice.

Hi everyone.

As the Humanities teacher who teaches Account, Economy and Business subjects, I would love to erase the negative stigma of the Arts stream. The negative association with the Arts stream is still as pervasive as ever whereby students with poor results predominantly going to the Arts stream meanwhile good students going predominantly to the Science stream.

When it comes to choosing between the Science stream and the Arts stream, one consider many factors. However, the most important one would be your own passions. There is no point trying to shove a square peg into a round hole: If your passion lies in accounting, then don't accept the Science stream just because that's where "the smart students" are.

In high school, accounting can be a challenging subject. There are several ways I use to teach accounting in school. One approach is to have students do hands-on projects. Another approach is to have students' complete modules.

Not to worry, Arts stream students can be successful with their actual passion for the Art subjects - it shows in your zeal and completed homework assignments.

The choice is up to you. Remember, do what you love!

## CHINESE NEW YEAR CELEBRATION

Everyone seemed to be having a wonderful day celebrating Chinese New Year at school. Just like any other celebrations at school before, this year, the Year of Rabbit was celebrated with so much joy by everyone at school.

Celebrating this festive day definitely teaches the students the meaning of togetherness and unity despite coming from different cultural backgrounds and religions. Everyone was making and toasting the Yee Sang together, learning how to make Chinese traditional foods and the Chinese students themselves were strengthening their cultural root when they competed in the calligraphy competitions organised on that day.

# Calligraphy Competition

Congratulations to our talented students, Cindy Teh Xin Yi and Khoo Jia Xuan for winning the consolation in the calligraphy competition which was held on 3rd February 2023 at SMJK Chan Hua Seremban. Six students from SRI UCSI SPRINGHILL CAMPUS participated in this competition.

Calligraphy, the art of beautiful handwriting implies a sure knowledge of the correct form of letters with conventional signs by which language can be communicated and the skill to make them with such ordering of the various parts and harmony of proportions that the experienced, knowledgeable eye will recognize such composition as a work of art.

# Valentine's Day Sale

Valentine's Day is a special day and it should be celebrated among friends as well. It is a day of showing love towards friends and to appreciate the friendship.

The Students Council Board organised a Valentine's Day Sale where students can buy the products sold and have it delivered to the recipient. It was more special since they could have it sent anonymously if they wanted to.

# BOOM BOOM BANG!

## End Of Year School Program

Boom Boom Bang is a 7 day program activity created for the students of Sekolah Sri UCSI Springhill to celebrate the end of the school year. There were varieties of fun activities organised by the teachers which was thoroughly enjoyed by the students. Not only they enjoyed all the activities organised, they also got to strengthen the bond with their friends.

Students spent their times outside of the classroom for a week doing activities such as playing traditional games, playing sports, enjoying the nature, swimming, cooking and singing. Students were divided into groups and they will collect points for every activity they did. It was exciting seeing how everyone had a healthy competition and tried their best to be the best group.

# Early Years Learning Activities

## Mandarin- Chinese numeral

Chinese numerals are one of the first things children should learn. Besides being used for counting and money, there are also used for time expressions such as weekdays and months. In order to help students recognize the Chinese numeral, teacher provide the student with fun and engaging opportunities to practice by designing resources. Teacher provides stickers for student to stick on the ice-cream cone template so that student not only can recognize the Chinese numeral yet able to pronounce the words correctly. Meanwhile, these activities also improve their eye-hand coordination.

## Making a Christmas Card

In time for Christmas, EYC students start making Christmas cards for their parents. They enjoy writing messages and adding their names to the cards. When beginning to write, some students make a mark on the page; some students attempt to form symbols or letter shapes, and some choose to copy teacher's writing. All of these, are valid forms of emergent writing. On the other hands, the most important thing for children to understand is their marks on the page carry meaning. After they finish the card making, they send the cards to their parents at home.

# Primary Learning Activities

## Making a Wind Rocket

Science project is always fun and educational. It involves a lot of critical thinking and problem-solving.

Our standard 2 students were assigned to create a model that use moving air. One of the model they built is a wind rocket.

## Creating Poem

These approaches have worked in English classroom in terms of engaging students with reading, analyzing, and writing poetry. The process of writing poetry can build vocabulary. Individuals will learn how to incorporate new words when writing and understand their meanings. Creativity is important when it comes to writing poetry.

# Secondary Learning Activities

## Aktiviti PDPC Pembentangan Aktiviti Dalam Kumpulan bertajuk Semerah Rozel

Untuk perkongsian pada kali ini, pengkhususan ditekankan kepada pembelajaran Bahasa Melayu dalam kalangan murid-murid Tingkatan 4 yang berkisarkan aktiviti membuat perbincangan dalam kumpulan berkaitan aktiviti penanaman rozel di Malaysia.

Murid melaksanakan aktiviti Role Play iaitu secara bergilir-gilir mengambil bahagian untuk menulis di papan putih berkaitan isi-isi penting daripada bahan rangsangan yang diberi.

Setiap wakil kumpulan membentangkan hasil dapatan daripada perbincangan yang telah mereka lakukan di hadapan rakan-rakan kelas yang dilihat dapat menyuntik semangat keberanian dan keyakinan diri dalam diri setiap murid.

## UCSI SPRINGHILL SWIMMING ACADEMY

### *Be a Swimming Master!*

Swimming helps to maintain a healthy weight, healthy heart and lungs. It is a healthy activity that you can continue for your lifetime.

In UCSI Springhill Swimming Academy, we are passionate to teach swimming with qualified coach, Olympic size swimming pool, facilities as well as dedicated customer service team.

#### Swimming Lessons:

- Child and Adult Swimming Lessons
- Four (4) lessons per month
- Open on Weekdays and Weekends
