"Having students wanting to come to school every day and love the learning environment is our goal in teaching and learning at Sekolah SRI UCSI Springhill" - JL

The joy and happiness that we create at school provide the path for the many learning journeys that one will embrace at school. We promise the best-exploring fun learning with holistic skills at school. Each student is given the freedom to express themselves and challenge everyday learning. The learning dynamics at SRI UCSI are beyond 21st-century learning and technology-based learning at school.

While we continue with the traditional needs and wants that many education providers would market in education, we take the approach beyond classroom teaching and learning. Students are developed in leadership, the 5C's (creativity, communication, character, critical thinking and collaboration) that we embed into each subject at UCSI schools and place them through real-world skills that one would need in their day-to-day surroundings.

"Variety and differentiated learning approaches with innovative teaching and learning skills build skills and values in each student at SRI UCSI" - JL

Respect, honesty, tolerance and kindness are key values that we impart in our daily teaching and learning at school and in every activity held at school. Education is not about just challenging the challenges and changes that the global society talks about in education delivery, its beyond that journey, its about moulding and nurturing each student with great values and skills of tomorrow and today. Imagine an individual going into the global economic environment with great skills and values along with the best in education and leadership skills, he or she will have an extraordinary advantage in making a difference. That differentiation strategy is what we at SRI UCSI advocate among our teachers and students. Each day is a learning journey for us as leaders and educators.

I believe an organisation that is holistic and agile will always bring about the best in each student. The journey is not about competing the other education providers but being different, being agile with changes, providing love to each student and above all creating happiness in all that we deliver at school. A 100% success and singing aloud about being the best school is never going to happen as we need to keep changing and accept the overwhelming challenges that we have as educators to ensure that we keep innovating and embracing differentiated teaching and learning methodologies.

" Trust in our journey as the destination is beyond imagination " - JL

Orientation Day

The new session begins! It was so great to see so many inspired parents along with eager students exploring their options and taking the first step towards their education journey in our SEKOLAH SRI UCSI SPRINGHILL CAMPUS. Parent's Orientation Program was conducted at MPH Hall of SRI UCSI SPRINGHILL CAMPUS. Academic Coordinator and school administrator apprised them of an overview of rules and regulations, academics & co-curricular activities that will be undertaken in the year ahead. The orientation programme is an opportunity to introduce the new students to life at the school and facilitate a smooth transition to the new life.

Moreover, the senior leadership team, school administrator, counselor, and marketing managers also conducted In-Service Training (INSET) for all the teachers in SEKOLAH SRI UCSI SPRINGHILL CAMPUS. We appreciate all the teachers' involvement and thank you for sparing valuable time for the sessions and workshops.

WELCOME BACK TO SCHOOL

The sweet smell of new beginnings! It's time once again to make memories you'll never forget. Today we start a new journey as our school is back in session for the new academic year 2023/2024. At Sekolah Sri UCSI Springhill, we believe in creating a safe and supportive learning environment where students grow and reach their full potential.

We would like to welcome all of our new students to Sekolah Sri UCSI Springhill. We hope this school will be the place where you connect with new friends, learn something new, and have fun while exploring new frontiers. We know it can be overwhelming, so we're here helping students and transitioning lives.

So let's get ready for this amazing journey!

UCSI EARLY YEARS CENTER **KiDE** SCIENCE

Holistic Preschool with Kide Science

International award-winning STEAM Science approach from Finland.

- Weekly music and movement classes, swimming, and computer lessons!
- Indoor classrooms and outdoor spaces to promote active learning

Early Years School Hours:
