Hari Raya Celebration

19th April

Our school is gearing up for a spectacular Raya celebration next week! Everyone is involved together in making sure the celebration will go well on 19th of April.

It is best believe that everyone is ready to indulge in delicious traditional foods, learned a technique or two about traditional cookies making, and most importantly be entertained by cultural performances that will leave everyone in awe.

Choosing The Right Kindergarten

Choosing the right kindergarten for your child is an important decision as it gives a significant impact on their future academic and self-development.

As an experienced kindergarten teacher, I understand the importance of choosing the right kindergarten for your child.

From my years of experiences, there are few important factors parents must consider before choosing the right kindergarten.

The classroom environment is critical for a child's learning experience. A good classroom has to be bright, colorful, and stimulating. Children would definitely enjoy learning in a comfortable, relaxe and conducive environment.

Accreditation also is an essential factor to consider when selecting a kindergarten. Parents have to make sure that the kindergarten has met specific educational standards and requirements. An educated and professional educator also plays role in making sure the children get the best education.

A good kindergarten also should provide healthy food options for children. A kindergarten that offers meals with the right balance of carbohydrates, protein, and healthy fats can help support your child's overall health and well-being.

Miss Lee

Term 1 Assessment

Term 1 assessment for Sekolah Sri UCSI students was conducted recently where its main focus was to test and evaluate students' knowledge and understanding of the curriculum for the first few weeks in the school.

The assessment results provide valuable insights into areas where students may require additional support and guidance. The school will use this information to identify students who may be struggling and provide them with the necessary resources to improve their academic performance.

Early Years Learning Activities

3D Shapes

Learning 3D shapes can aid artistic development in children. They can make better paintings and craft items with some knowledge of 3D shapes.

In this lesson, students learned about some common 3D shapes. The students then were given clay to make the 3D shapes they chose. They were happy to do this activity since they used clay to make the 3D shapes.

For second activity, the students were given a worksheet whereby they cut the pictures from the activity paper and pasted them into the boxes according to the 3D shapes given.

They also counted the total of vertices, edges, and faces according of the 3D shapes.

Hari Raya Arts and Craft

Students were excited to step into Hari Raya preparation. Students did few arts and crafts to celebrate this festival. The first activity was decorating the classroom with lanterns. Students had to cut the lanterns, pasted star stickers on the lanterns and decorated their classroom with the lantern pasted on the wall.

The second activity was coloring the 'ketupat'. Teacher did some explanation about what 'ketupat' is and the importance of 'ketupat' during Raya celebration. Each student got a 'ketupat' coloring worksheet which they happily colored it in yellow and green colors. They enjoyed coloring two to three 'ketupat'. They also decorated the class with the 'ketupat' they had just colored.

Primary Learning Activities

Magic Words

A successful person is not someone who is wealthy but rather someone with a great manners. Therefore it is very important for students to learn about it in school since a young age. To make learning about 'Magic Words' more fun, our Standard 1 student created a Magic Word model for his English class project.

Words are full of 'magic' when used in a correct way. This is why students were taught to use magic words such as 'Thank you' and 'Please' in their daily conversations. These magic words also teaches students to be respectful and be polite while talking with others.

Prepping for Hari Raya Celebration

As the Hari Raya festival is coming up, students have been actively involved in decorating their classes. We had been busy gathering decorations including lampu pelita, ketupat lightings, Hari Raya wall decorations and even ornaments illustrating Raya celebration. This year, students will also be performing for the Hari Raya Celebration and they were having a great time practicing for their performances to perform in front of their friends and family. They can't wait to share their performances!

Secondary Learning Activities

Bicara 5 Minit

One of the activities in the classroom that give positive impacts for Bahasa Melayu subject for form 1 students is "Bicara Lima Minit". Every day, 1 student will do a presentation about any topic of their interest for 5 minutes. Students can choose a topic they would like to talk about and they do the practice at home. The presentations must include the introduction, main points, elaboration of the points, and conclusion. This activity not only helps them in speaking Bahasa Melayu but also helps them to write essays as they learned how to elaborate the topics chosen.

CCA Secondary : BADMINTON

Among the many sports and games offered by the school, badminton is one of them. Students of all age groups in UCSI enjoy playing badminton as a CCA option. Playing badminton individually develops an individual to develop his skills for personal excellence meanwhile playing as double pair develops team work and co-operation. It is an excellent sports that's great to be played during leisure time as it involves rigorous physical activities that helps students to stay fit and yet feeling happy at the same time.

UCSI SPRINGHILL

SWIMMING ACADEMY

Be a Swimming Master!

Swimming helps to maintain a healthy weight, healthy heart and lungs. It is a healthy activity that you can continue for your lifetime.

In UCSI Springhill Swimming Academy, we are passionate to teach swimming with qualified coach, Olympic size swimming pool, facilities as well as dedicated customer service team.
