

Santhanasamy Amaladas brings over 35 years of distinguished experience in educational leadership. Formerly the Principal of St. Paul's Institution (Primary), he successfully guided the school through its transition to a co-educational model and strengthened its academic and co-curricular reputation. Holding a Bachelor of Education (TESL) and a Diploma in Professional Educational Leadership from Institut Aminuddin Baki, he has received several accolades, including the Pingat Khidmat Masyarakat (PMC) and the Pearson Longman Leadership Scholarship to Cambridge. Passionate about educational innovation, Santhanasamy Amaladas has led tech-focused school upgrades and is committed to building a vibrant, inclusive and future-ready learning environment at Sekolah Sri UCSI Springhill.

SEKOLAH SRI UCSI SPRINGHILL (SEREMBAN/PD)

Dear Parent,

At Sekolah Sri UCSI Springhill, Negeri Sembilan, we are committed to delivering high-quality 21st-century education that nurtures global citizens and future-ready leaders. Our holistic approach ensures that students not only achieve academic excellence but also develop critical competencies through the 5Cs: communication, collaboration, creativity, critical thinking and character.

We offer a dual curriculum, the Malaysian National Curriculum alongside the Cambridge Primary and Lower Secondary programmes, to give students both local grounding and international exposure. This combination equips learners with the best of both worlds and broadens their future pathways.

As a trilingual school, we also place strong emphasis on Bahasa Malaysia, English and Mandarin. Daily Mandarin lessons are integrated from the early years to build language proficiency and cultural understanding, giving our students a competitive edge in today's globalised world.

Our passionate educators are dedicated to delivering engaging, future-focused lessons that foster academic growth, curiosity and a lifelong love for learning. At Sekolah Sri UCSI Springhill, your child will thrive in a supportive environment designed to develop both their intellect and character.

As such, we would be honoured to welcome your child into our exciting school community.

If you have any questions or would like to find out more, please contact us at:

+6018 977 9880 or enquiry.sh@sriucsi.edu.my.

Thank you for considering Sekolah Sri UCSI Springhill for your child's education.

Best regards,

Santhanasamy Amaladas

Principal

THE BEST OF NATIONAL AND INTERNATIONAL EDUCATION WITH DAILY TRILINGUAL LEARNING

At exceptional value

From RM1,052 per month

01 Trilingual Focus

Daily Mandarin lessons are offered at the primary level (in addition to Bahasa Melayu and English), giving students a strong multilingual foundation and a competitive edge in a globalised world.

02 Character Education

We incorporate Character Education curriculum in classrooms, assemblies and school events, emphasising virtues and values alongside academics. Students and staff strive to demonstrate innovation, self-expression and diligence while maintaining respect, empathy and honesty.

03 Microsoft Showcase School

We are supported by Microsoft Education and our team of teachers are all trained and certified via Microsoft Educator programmes to facilitate the development of 21st-century skills (4Cs: Critical thinking, Collaboration, Creativity and Communication) in students and also apply technological tools in teaching and learning.

04 KIFA Programme

Muslim students will enrol for the Kelas Intensive Fardhu Ain (KIFA) programme.

05 Dual Curriculum

We provide both a national and international curriculum of education for our students where they are given the opportunity to sit for both SPM and IGCSE exams. For IGCSE, the Cambridge checkpoint exams will be in Standard 6 and Form 3 in place of the abolished UPSR and PT3, enabling their academic progress to be assessed and benchmarked according to international standards.

06 Dual Language Programme (DLP)

Sekolah Sri UCSI Springhill is amongst the few private schools in Malaysia with DLP status, teaching Mathematics and Science in English. This supports our trilingual approach to teaching students in English, Bahasa Malaysia and Mandarin and prepares students for both local and global success.

07 Intervention and Extra Classes

With a variety of learning abilities among students, there is always a need to enhance and boost academic development through intervention and extra classes. Our intervention programme is designed to provide progressive academic achievements, where a student meets the benchmark within a classroom. The extra classes provide a one-stop solution where no students require extra tuition or external support.

08 Extra-curricular Activities (ECA) and Co-curricular Activities (CCA)

A wide range of extra and co-curricular activities are offered, enabling students to have the confidence to interact socially with others. These include robotics and coding, sports, swimming, international competitions, uniform bodies and more. Each of our programmes is designed to meet the needs of 21st-century learners by developing the 5Cs among all our students. Our transformational programmes emphasise creativity and innovative thinking.
