**CABARAN DAN PERUBAHAN DALAM PENGAJARAN DAN PEMBELAJARAN
BAHASA MELAYU DALAM ERA GLOBALISASI**

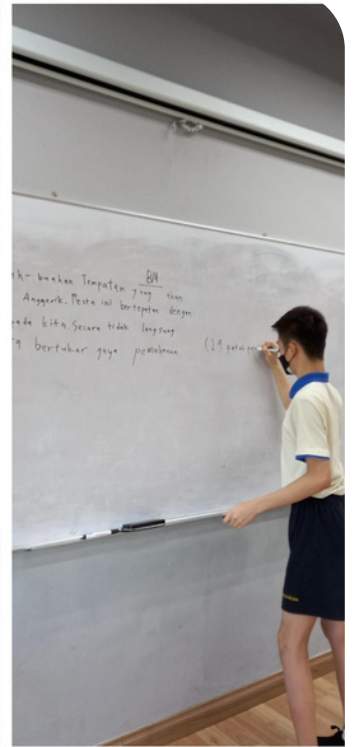

SEKAPUR SIRIH SEULAS PINANG

DITULIS OLEH CIKGU RAMLAH

Dunia era globalisasi kini memperlihatkan perkembangan ilmu yang begitu pantas. Kemajuan dalam teknologi maklumat memberi kesan secara langsung atau tidak langsung dalam kehidupan dan sistem pendidikan. Perubahan demi perubahan yang berlaku itu turut membawa bersama isu dan cabaran terhadap pengajaran dan pembelajaran Bahasa Melayu di sekolah.

Pelbagai isu dan cabaran yang saya hadapi sebagai seorang guru yang mengajar Bahasa Melayu dalam usaha mengembangkan potensi berbahasa seiring dengan perkembangan dunia semasa dalam kalangan murid-murid yang majoritinya bukan berbangsa Melayu.

Asbab kebanyakan anak-anak didik saya yang kini semakin mementingkan Bahasa Inggeris telah menyebabkan pembelajaran Bahasa Melayu semakin tercabar. Justeru, saya perlu kreatif dan inovatif dalam mencari dan mengubah suai pendekatan agar selari dengan keperluan pelajar. Dalam masa yang sama saya juga perlu bijak dalam memupuk sikap cintakan bahasa kebangsaan kepada pelajar yang telah dimomokkan dengan kepentingan bahasa Inggeris agar tidak menimbulkan konflik lain.

Pendekatan pengajaran dan pembelajaran bahasa Melayu khususnya pengajaran kemahiran menulis memerlukan contoh-contoh sesuai yang terbaik dan menggunakan Bahasa Melayu yang standard.

Kedadaan ini memerlukan saya menyediakan satu pendekatan yang menyeluruh merangkumi aspek kemahiran mendengar, bertutur, membaca dan menulis. Dalam konteks ini saya perlu mendalami ilmu bahasa dan ilmu pendidikan agar selari dengan perkembangan semasa. Tuntasnya, saya sebagai guru Bahasa Melayu harus bekerja keras dan membuat anjakan dinamik untuk mengatasi cabaran yang getir ini bagi melestarikan dan memartabatkan bahasa Melayu ke peringkat yang lebih tinggi.

PAST EVENTS

MALAY WEEK

In conjunction with our Bahasa Melayu Week, the school held various activities for our beloved students to build students' interest in learning our national language. We are committed to promoting and enhancing the proficiency of its students in the national language with activities throughout the week.

ENGLISH WEEK

English Week, a vibrant and engaging event, aimed to nurture all skills through friendly competition and collaboration. Students engaged in three exciting competitions: Scrabble, News Reading, and Spelling Bee. This event fostered language skills, teamwork, and friendly competition, enhancing their English proficiency and enthusiasm for the language.

MANDARIN WEEK

Mandarin Week, a vibrant celebration of Chinese language and culture. Students engaged in diverse competitions such as karaoke, quiz and penmanship. This week fostered cultural appreciation, language skills, and teamwork among students, promoting a deeper understanding of Mandarin and Chinese culture.

Upcoming Event!

16/10 - 20/10 : World FOOD Day

23/10 - 30/10 : STEM Week

31/10 - NATIONAL SPORTS DAY

LEARNING ABC 'LIKE A CHEF'

Flour is not only used for the purpose of cooking but also can use for learning. The young children learned the "Letter R r" by tracing the letter on top of the flour. They not only learned the correct formation of the letter "R r" in a fun way but also learned without the pressure of "getting it right" using a pencil.

Sensory play for children can be very therapeutic and relaxing.

The children are able to develop their sense of touch and smell through this activity since they are able to feel the texture of the flour and smell the flour.

PRIMARY LEARNING

Fly The Kite

To teach students about our culture, we had a fun kite-making activity in the fifth-grade classroom. The students made cool, eco-friendly kites that amazed everyone. They worked together in groups and talked about what kind of kite to make. It was a nice chat and a way to make memories with friends. Being an outdoor activity, kite flying brings the students closer to nature.

In the end, seeing the smiles on our students' faces as they crafted and flew their kites, it's clear that they truly enjoyed this lesson.

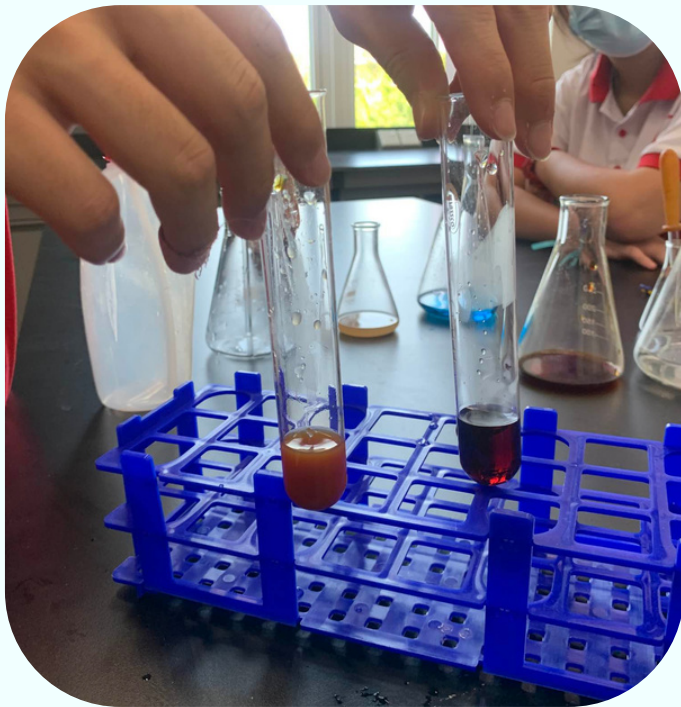

Secondary Learning

Starch and Amylase Experiment

A group of F4 students recently conducted a cool experiment delving into the interaction between starch and amylase, shedding light on the process of enzymatic digestion. Amylase is like a special tool that breaks down starch into sugar, which our bodies can use for energy.

Students prepared a series of starch solutions of varying concentrations, ranging from highly concentrated to dilute. The students discovered that the amylase enzyme efficiently broke down the starch molecules in the more concentrated solutions.
