Upcoming News Events

Recycling Week 7th June

During this special week we will be together to promote sustainable practices and raise awareness about the importance of recycling. We aim to educate everyone on, the benefits of recycling, and the impact it has on our ecosystem.

Report Card Day 9th June

The time where teachers and parents will discuss about students' performances in Term 1. Parents, teachers, and students to come together and have meaningful conversations about academic performance, growth, and development.

Field Trip 16th June

Our primary and EYC students will be having their best time going on a trip with teachers and friends. They will be going to interesting places and doing fun activities. Students will have the opportunity to explore new places and expand their knowledge beyond the classroom walls.

" They May Forget What You Said, But They Will Not Forget How You Made Them Feel "

Teacher Jasmine

I chose to be an Early Years Teacher because I love being with children. To me it's not just a job. It's more like an interest I have in. Just like artists, they love to create art, I love to teach the little ones myself.

As a child I looked up to my kindergarten teacher. It's been years but I still remember her name.

I might had forgotten about many things, but I still remember how she made me feel - happy and joy. Like my quote says, " they may forget what you said, but they will not forget how you made them feel." Being a teacher requires total dedication, devotion and loving environment that is fun and exciting.

I want children to discover and at the same time learn about the world around them. A child's brain development is essential, as early learning is the most crucial moment where their brains develop through experiences with factors such as emotional, social, physical, and intellectual development.

It is very inspiring when I get to see them mastering a new skill or achieved something that most probably, I had to teach in multiple different ways. Some days are really exhausting, but - "whoosh!" all those tiredness goes away the next morning when we greet them . Back to my quote – my goal is to always let them experience a fun learning environment where they would love to come to school everyday and make them feel loved and cared!

Sri UCSI Hari Raya Celebration 2023

A festive fusion of joy, laughter, and cultural unity! Celebrating diversity, love, and delicious feasts. We had a fun-filled Hari Raya celebration few weeks ago. The EYC, primary, and secondary students amazed us with their wonderful and splendid performances. Our dedicated teachers also joined the celebration with their dancing performances.

We would like to thank parents for bringing traditional food and snacks to share with us for the potluck session. They truly embody the spirit of giving and sharing during this festive season. To further commemorate the occasion, we organized exciting games such as coloring, 'Anyaman Ketupat', and making Raya cookies. The main dishes cooked during this celebration were 'Nasi Impit' and 'Chicken Rendang,' prepared by the Malay teachers and students.

It was truly a joyous celebration for all!

Early Years Learning Activities

Gardening Activity

It was a Sunny Day and our kids learned all about the tools and items they will see in the garden such as fence, tool shed, tools, hose, grass, flowers, watering can and much more! Before started teacher shared a video in class on what are in a garden, let children touch and feel including a flowerpot, and they tried on garden gloves. Then they all adjourned to the school garden where teachers let them touched the grass and saw some large tools from the tools shed, like a lawn mower, garden broom and even let them try rolling a wheelbarrow. Lastly, they were all given a chance to water some plants!

Get to know Number 12

Students are excited to learn about the number 12. In the first activity students trace the number 12 in the activity book and circle the number 12 on the activity paper given. For the second activity students rearranged cups according to the order - from number 1 - 12 -.

Finally students must arrange the cloth clips according to the number written on the cloth clips and arrange them accordingly with the correct sequence.

Now students can arrange the numbers in the correct sequence and are able to recognize number 12. The students enjoyed these activities and the interaction between the students contributed significantly to their social and cognitive development.

Primary Learning Activities

Bulatan Membaca

Kaedah bulatan membaca merupakan satu kaedah yang bagus dalam sesi pembelajaran dan pengajaran. Menggunakan kaedah ini, para pelajar menjadi lebih fokus dan peka pada bahan pembacaan.

Dalam sesi pembelajaran kali ini, para pelajar duduk di dalam bulatan dan membaca teks di dalam buku secara bergilir-gilir. Kemudian pelajar bekerjasama menjawab soalan yang diberikan oleh guru. Seterusnya pelajar juga melakukan aktiviti tambahan iaitu membina ayat.

Kesemua pelajar menggemari aktiviti ini. Mereka juga dapat membina ayat dengan begitu baik.

SEGAK Fitness Test

SEGAK Fitness Test is an exciting initiative aimed at promoting health, fitness, and an active lifestyle among our students. It is a health-related assessment system implemented in schools in Malaysia. It aims to evaluate and promote students' health and physical fitness levels. The physical fitness tests involve activities like push-ups, sit-ups, and stairs climbing. These tests assess students' muscular strength, endurance, speed, agility, and cardiovascular fitness. Overall, SEGAK serves as a tool to monitor and promote the well-being of students, encouraging them to adopt healthy habits and lead active lives.

Secondary Learning Activities

Be Confident

Confidence is a big factor in keeping students engaged with their education and the world around them. By helping students to build their confidence, teachers are allowing the students to believe they have the potential to achieve and reduce their fear of failing.

This motivates them to attend school regularly, have better focus during classes, and complete homework and exams to the best of their ability. Overall, we need to build confidence in all students to help them reach their full potential in education, and in their future careers.

HTML HEADING / COLOR CODE TAGS

In our recent coding lesson, students learned further about the fundamental building blocks of HTML, particularly the Heading and Color Code tags. Students not only reflect the basic coding structure of HTML but also learned typing and clarifying script codes successfully.

Students learned how to utilize heading tags to create headings of varying sizes. They also learned to apply colors to elements on a webpage by using color tags.

A screenshot of a web browser showing HTML code on the left and its rendered output on the right. The code includes various heading tags (h1, h2, h3, h4, h5) with background color attributes. The rendered output shows the corresponding headings in different colors and sizes: 'Xin Rong Hello World', 'SRI UCSI, SPRINGHILL', 'Secondary 3', 'SlateBlue', and 'Good Bye'.

UCSI EARLY YEARS CENTER

KiDE SCIENCE

Holistic Preschool with Kide Science

International award-winning STEAM Science approach from Finland.

- Weekly music and movement classes, swimming, and computer lessons!
- Indoor classrooms and outdoor spaces to promote active learning

Early Years School Hours:

- Half Day (8.00am - 12.30pm)
- Full Day (8.00am - 4.00pm)

06 - 6536888
